

Website I used

<http://www.mess.be/inickgenwuname.php>

Screenshots of steps in PuTTY

**Step 1:** I used the “-I” command to return the server response from the header.

A screenshot of a PuTTY terminal window titled 'atria.cs.odu.edu - PuTTY'. The terminal shows the command 'curl -I http://www.mess.be/inickgenwuname.php' and its output. The output is an HTTP header response: 'HTTP/1.1 200 OK', 'Date: Fri, 27 Jan 2017 04:37:00 GMT', 'Server: Apache/2.2.29 (Unix) mod\_ssl/2.2.29 OpenSSL/1.0.1e-fips mod\_bwlimited/1.4', 'X-Powered-By: PHP/5.4.39', and 'Content-Type: text/html'. The prompt 'atria:~>' is visible at the bottom with a green cursor.

```
atria:~> curl -I http://www.mess.be/inickgenwuname.php
HTTP/1.1 200 OK
Date: Fri, 27 Jan 2017 04:37:00 GMT
Server: Apache/2.2.29 (Unix) mod_ssl/2.2.29 OpenSSL/1.0.1e-fips mod_bwlimited/1.4
X-Powered-By: PHP/5.4.39
Content-Type: text/html

atria:~>
```

**Step 2:** The “-F” command generates a form so that I can test how the input works on the site. In this instance, “realname” is the value assigned to variable “name.” I found this by viewing the source code for the website:

```
<form action="/inickgenwuname.php" METHOD="POST">
  <div align="center"><input type="text" name="realname" size=25>&ntsp;
  <input type="submit" value="Enter the Wu-Tang" name="Submit"
  </div>
</form>
```

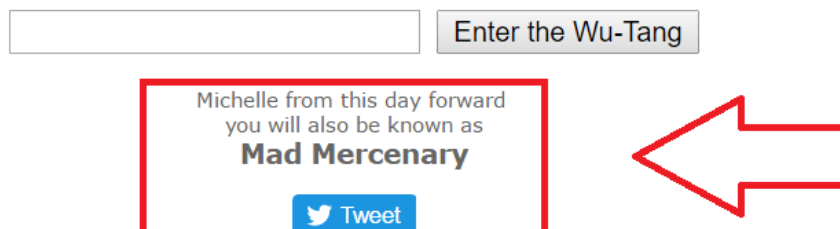

Therefore, when I set “Michelle” as the “realname,” a new name should be generated!

```
atria.cs.odu.edu - PuTTY
atria:~> curl -F 'realname=Michelle' http://www.mess.be/inickgenwuname.php
```

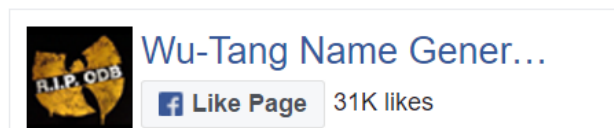

Step 3: Shows that typing in, “Michelle,” yields the desired results!

```
atria.cs.odu.edu - PuTTY
Deck, Method Man, RZA, GZA, Raekwon</i>, the late <i>Ol' Dirty Bastard</i> and
the other Staten Island, New York clan members using this <strong>Wu-Tang Names
Generator</strong>.<br>
Become a real <b>Wu warrior</b>, entah ur <b>full name</b> 'n smack da ol' dir
ty button</p>
</td>
</tr>
</table>
<form action="/inickgenwuname.php" METHOD="POST">
  <div align="center"><input type="text" name="realname" size=25>&nbsp;
  <input type="submit" value="Enter the Wu-Tang" name="Submit">
  </div>
</form>
<p align="center">
  <center><b><font class=normalText>Michelle</b> from this day forward <br>you wil
  l also be known as </center><center><b><font size=2>Mad <img alt="red arrow pointing left" data-bbox="608 475 680 505" style="vertical-align: middle;"/>Mercenary
  </b></font></center><center><br /><a href='https://twitter.com/share' class='twi
  tter-share-button' data-text='From this day forward, I will be known as... Mad
  Mercenary
```

I verified this by testing it on the actual website:

g Name Generator on Facebook and share your Wu name on our page! And stay tuned for a massive update, cheats, etc.

de and, of course, Donald Glover, whose Wu-Tang name is *Childish Gambino*, for the mention on The Tonight Show with
